Within **GREEN ENERGY Department**, the Company focuses on the promotion of energy solutions produced from
Renewable Sources
– GREEN ENERGY
, in Romania (especially
biomass
and
bio-fuel).

The specialists in the department have made studies, based on which the Company has identified and secured more locations with a very good technical potential, in the north-eastern and south of the country, where it plans to develop GREEN energy projects – an ecological and inexhaustible source of energy.

EA GE-T has necessary logistics, HR and expertise to provide support and services, for the commencement and future development of green energy projects, offering INVESTMENTS OPPORTUNITIES:

Green Energy Projects: SALIX Project [a plant with power characteristics used to produce biomass]
